TO WHOM IT MAY CONCERN

**RE: Letter of Reference & Confirmation of Completed Sub-Contract**

Hitech Construction Company Ltd. is a Nigerian Civil Works Contractor with our Head Office registered in Plot 1682 Sanusi Fafunwa Street, Victoria Island, Lagos.

Wreckers Dismantling (Pty) Ltd. of South Africa were appointed by Hitech and Lagos State Government (Ministry of Works & Infrastructure and Ministry of Physical Planning) as Project Manager and Implosion Specialist to carry out the Implosion of the 22-storey Bank of Industries (BOI) fire-damaged Building in Marina, Lagos CBD.

The project was carried out in a professional manner and the implosion of The BOI Building was a great success for all concerned. Additional measures were implemented to ensure that no damages occur to surrounding properties, especially a 100-year old church which was in close proximity (less than 16 meters) from the BOI Building. No incidents were reported during the preparation (April 2008 – September 2008) or on the day of the Implosion (21 September 2008) of the building, or thereafter during site clearance.

We would gladly work with Wreckers on future projects. Do not hesitate to contact the undersigned in case of any enquiries.

Yours faithfully,

Lizelle Botha

Project Manager
